Languages Known: Hindi,English

Hobbies and Interest : Cryptocurrency, Blockchain, Reading, Sports and Games

PROJECTS

EventEase – Online Ticket Booking Application

A feature-rich MERN-stack platform designed for seamless event discovery, booking, and management

- Developed **RESTful APIs** with **Express.js** and **MongoDB** to handle events, ticket booking, and user management.
- Built **reviews and ratings** functionality, enabling a trending events section powered by real-time audience feedback.
- Integrated **Wallet rewards system** and **WebSocket-based real-time chat rooms** for event community interaction.
- Designed an organizer **analytics dashboard** with data visualization to track ticket sales,overall event performance

Ethereum-Based Crowdfunding DApp

A decentralized platform enabling users to create and manage fundraising campaigns using ETH and USDT.

- Developed a fully decentralized crowdfunding platform using **Solidity**, **React.js**, and **Ethers.js**.
- Integrated **IPFS** for decentralized storage of campaign metadata such as name, description, and image.
- Implemented secure fund withdrawal and automatic refund mechanisms based on campaign success.
- Enabled seamless wallet interaction through **MetaMask** using Ethers.js.

Blog Web Application

A responsive and feature-rich blogging platform built with a modern tech stack.

- Developed a full-stack blog app using **React.js**, **Redux Toolkit**, and **Appwrite** for backend services.
- Integrated **TinyMCE** editor for rich text post creation, editing, and deletion.
- Implemented secure user registration, login, and session handling with form validation.
- Used **Tailwind CSS** for styling and **Git** for version control throughout development.
